Software Engineer Oyetoke Toby

27/09/1999 • 1a Emmanuel Aina Str, Lagos, Nigeria • +2348155737518 • oyetoketoby80@gmail.com • citguru.github.io

I am an innovative, creative thinker who is adept at coming up with real solutions that work for end users. I have experience in a wide variety of software, system architectures, and programming languages. I have held responsible positions in a number of companies and as freelancer specialising in IT services as a programmer, tester, devops,etc.

Work experience

Lead Software Engineer
04/2018 – 10/2019

Diamond Acre Software, Lekki, Nigeria
- Responsibilities: Mentoring systems administrators, supporting agile development teams, introducing work methods to support CI/CD, software programming in Python, Go, Rust, JavaScript.
- Project lead with: automated testing for Python/Django with Jenkins, React/Jest, Dynamic Infrastructure with AWS and Docker, Benefits Management System.
- I implemented a more robust development process, working on backend and frontend simultaneously
- It was a fun place to work, the people are friendly. Agile SCRUM methods were used by all the teams, not just the programmers. We seem to keep busy without it becoming a high-pressure environment.
- Got promoted twice in the range of one year.
- Wrote an in-house UI Library for consistent User Interfaces

FullStack Developer
09/2016 – 10/2017

Vestub, Remote, US
- Worked with a team of two in turning a startup idea into a scalable products.
- Designed the whole system architecture from the backend to frontend.
- Managing servers, writing documentation and writing tests.

Web Developer
08/2014 – 04/2016

SIITGo, Lagos, Nigeria
- I worked on the SIITGo Course Portal and Admin Panel.
- Wrote a Python script to auto certify students with their course data.
- Wrote Technical Course Documentation
- This position was working as a junior web developer and I got promoted to a web developer. It was enjoyable and I learnt a lot.

Education

Computer Science
09/2017 – 09/2019
